WATERY WOES: A woman pushing a freezer through rising flood waters in the southern Thai province of Yala, which has been hit by torrential monsoon rains in the past week.
HEAVY RAIN TRIGGERS FLOODS

KUALA LUMPUR: Unusually heavy rain over the weekend caused floods in three north-eastern Malaysian states that forced the evacuation of more than 800 people and left at least one man missing, reports said yesterday.

About 550mm of rain fell in two days in the worst-hit district of Dungun in Terengganu state, equivalent to nearly a quarter of the national average annual rainfall.

The floods, triggered by torrential rain, have left 20 dead in southern Thailand and 32 in central Vietnam as well as forced thousands of residents in central Philippines and northern Malaysia to flee their homes.

Hundreds of villagers in the central Philippine island of Mindoro were also forced to flee their homes on Saturday after days of monsoon rains flooded their communities for a second time in as many weeks.

In Vietnam, at least 32 people have died so far this month in floods, officials said yesterday.
